Future Female  
Innovators In STEAM

FabConnectHer is working to empower future female innovators through inspiration, skills, and networks to make an impact in the field of STEAM through education, reemployment or entrepreneurship.

Our ERASMUS+ funded project takes what we all know as solutions to increase the numbers of girls and women in STEAM e.g. more mentoring, greater visibility of female role models, training strands that start young but build and grow, and combine them in highly accessible offering.

Rather than focusing on one particular solution, such as mentoring or classroom based training, the project takes a multi-faceted approach that targets women/girls of different age groups and focuses on different aspects of learning and career development that women experience.
